

Delphic LIS

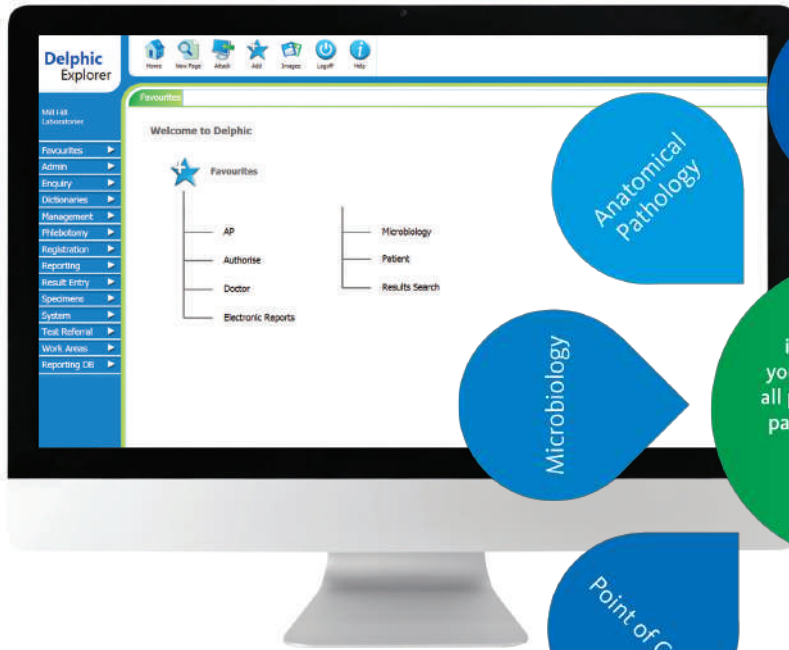

Introducing the best way
to support lab workflow
and deliver results

Why Delphic?

- A centralised, highly scalable LIS that delivers workflow support to all lab departments
- Streamlines the flow of information within and between laboratories
- A modern, easy to use configurable system
- Simplified and centralised multi-lab management for standardisation of processes and people
- The ideal platform for regional consolidation

Anatomical Pathology

Haematology

Biochemistry

Microbiology

Delphic is the backbone of your lab, streamlining all processes, across all pathology disciplines with accuracy, efficiency and reliability.

Molecular Genetics

Point of Care

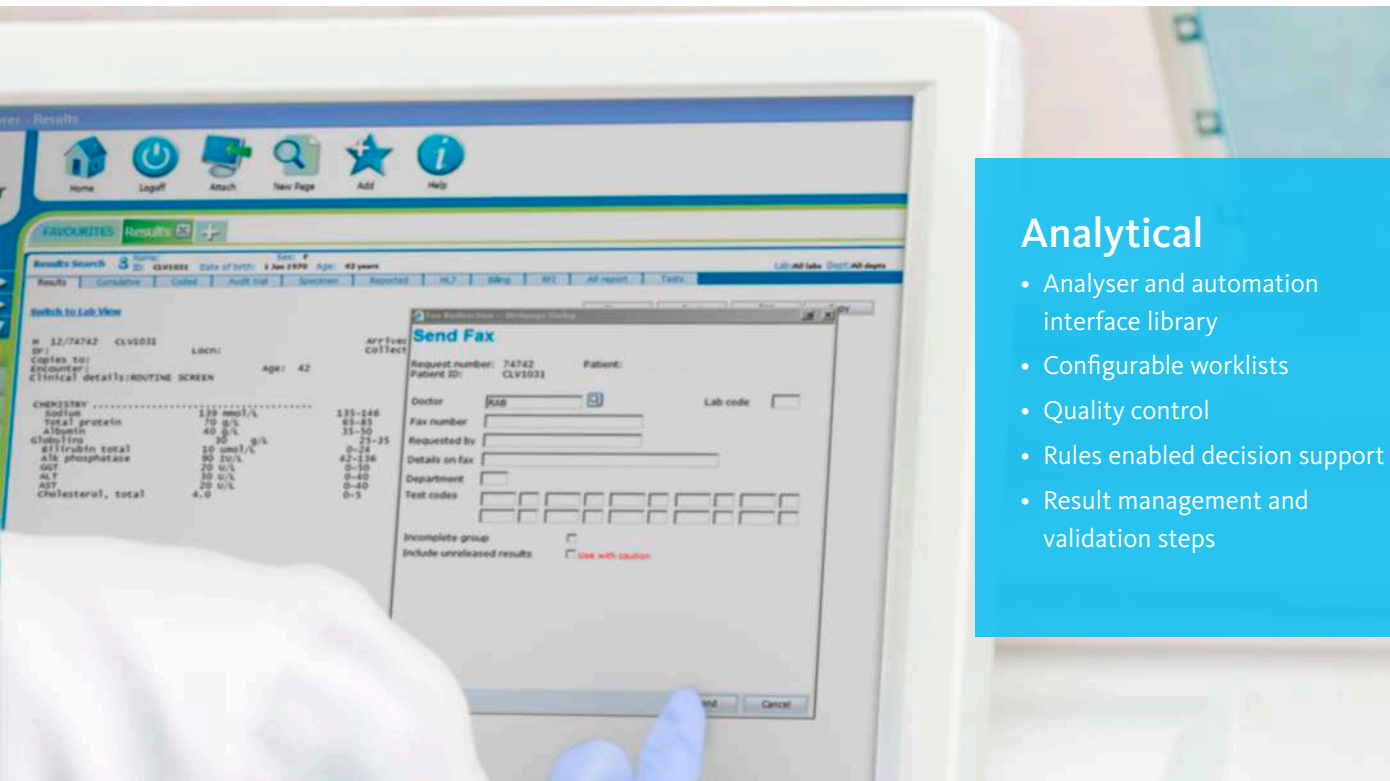

Immunology

Cytogenetics
